SUMMARY

Highly adaptable Computer Science graduate, full-stack developer, and DOST-SEI Scholar who thrives in structured environments. Eager to rapidly adopt new technologies, improve technical skills, and contribute value to a professional team. Proven track record of developing end-to-end projects using React, Node.js, and Python. Strong collaborative teammate experienced in using version control and delivering under technical constraints within team environments.

TECHNICAL SKILLS

Frontend: React.js, Tailwind CSS
Backend: Node.js, Express.js, Python
Databases & Tools: MySQL, Sequelize ORM, Git / Version Control
Core Competencies: Full-Stack Web Development, RESTful APIs

EXPERIENCE

Frontline Business Solutions
Full-Stack Web Development Intern | June 2025 – August 2025

- Completed a comprehensive 240-hour internship program focused on full-stack web development.

TECHNICAL PROJECTS

ReadTrack (Senior Thesis Project) | *Python, React.js, Machine Learning*

- Engineered a full-stack web application designed to evaluate user reading capabilities through linguistic diagnosis.
- Implemented a Natural Language Processing (NLP) pipeline utilizing a custom-trained Support Vector Machine (SVM) text classification model.
- Designed the evaluation architecture to automatically process inputs and output accurate, qualitative reading proficiency classifications such as Independent, Instructional, or Frustration levels.

ALAB (Freelance Commission) | *Full-Stack Development*

- Developed and delivered an educational resource platform for public high schools to streamline laboratory administration, including equipment bookings, material requests, and scheduling.
- Engineered a "safety gate" assessment module that enforces student concept mastery and safety proficiency prior to granting physical lab access.
- Successfully translated client requirements into a deployed system that prioritizes and automates student safety compliance.

Organization Automation System
(Software Engineering Academic Project) | *React, Express, MySQL, Node.js*

- Built a full-stack web application to centralize and automate organizational workflows, managing events, documents, and evaluations.
- Integrated real-time chat functionalities to improve communication and operational efficiency.
- Collaborated within a team environment to architect a robust database schema and deliver technical requirements under strict academic deadlines.

EDUCATION

Bachelor of Science in Computer Science
Bicol University – Polangui Campus | Graduated: June 18, 2026

- **Honors:** Cum Laude (GWA: 1.713)
- **Awards:** DOST-SEI Junior Level Science Scholar (Awarded 2024)
